ENTERED AT SAN FRANCISCO, CAL. AS SECOND-CLASS MATTER

Cabot Differential Diagnosis

SECOND EDITION

Dr. Cabot's method of presenting his subject is like actual medical practice. Each patient comes to you complaining of some particular symptom—headache, backache, cough, etc. These are the first things you get to work from. These are the *presenting symptoms* from which you must work inwards and backwards. Dr. Cabot tells you how to do this. No other book does.

Octavo of 764 pages, illustrated. Presented through an analysis of 385 cases. By RICHARD C. CABOT, M.D., Assistant Professor of Clinical Medicine, Harvard Medical School.

Cloth, \$5.50 net; Half Morocco, \$7.00 net.

Bonney Pulmonary Tuberculosis

SECOND EDITION

Dr. Bonney's work, issued at a time when the prevention and cure of tuberculosis is receiving such widespread attention, is opportune. The work is a thorough one, considering the entire subject of pulmonary tuberculosis and all its many complications. The section on Physical Signs of Pulmonary Tuberculosis is really a complete monograph on the physical diagnosis of diseases of the chest. Treatment is particularly full and practical.

Octavo of 955 pages, with 243 illustrations, including 31 in colors and 73 x-ray photographs. By SHERMAN G. BONNEY, M.D., Professor of Medicine, University of Colorado.

Cloth, \$7.00 net; Half Morocco, \$8.50 net.
